

# Advisory Committee Meeting Summary

March 5, 2026  
Littlefork Community Building

## Introduction

The Advisory Committee met in Littlefork to review actions and implementation tables that have been developed by the Steering Committee. Implementation tables define the actions used to achieve plan goals. Following this review, April's meeting will work towards finalizing plan details (**Figure 1**).

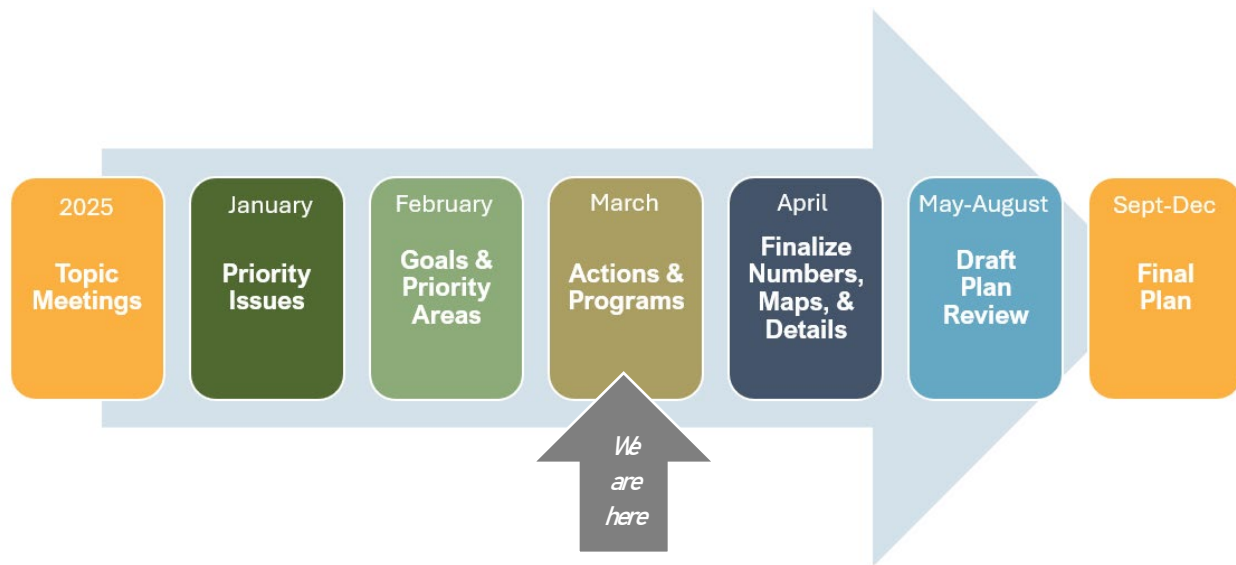

Figure 1. Timeline for the LFRW 1W1P.

## Plan Programs

An important component of the implementation tables are plan programs. These plan programs are standardized across 1W1Ps in the Rainy Basin. There are four main programs: Planned Landscape Management ("Manage It"), Constructed Environmental Enhancements ("Fix It"), Protected Lands Maintenance ("Keep It"), and Data Collection and Outreach ("Know It"). These programs balance differently in different watersheds based on the needs of that specific watershed. For this watershed, the "Keep It" program is lighter because of the higher percentage of public land. The "Manage It" and "Fix It" have more of the focus (**Figure 2**). All programs are balanced on "Know It", which is collecting and distributing information and essential for implementation of the other three categories.

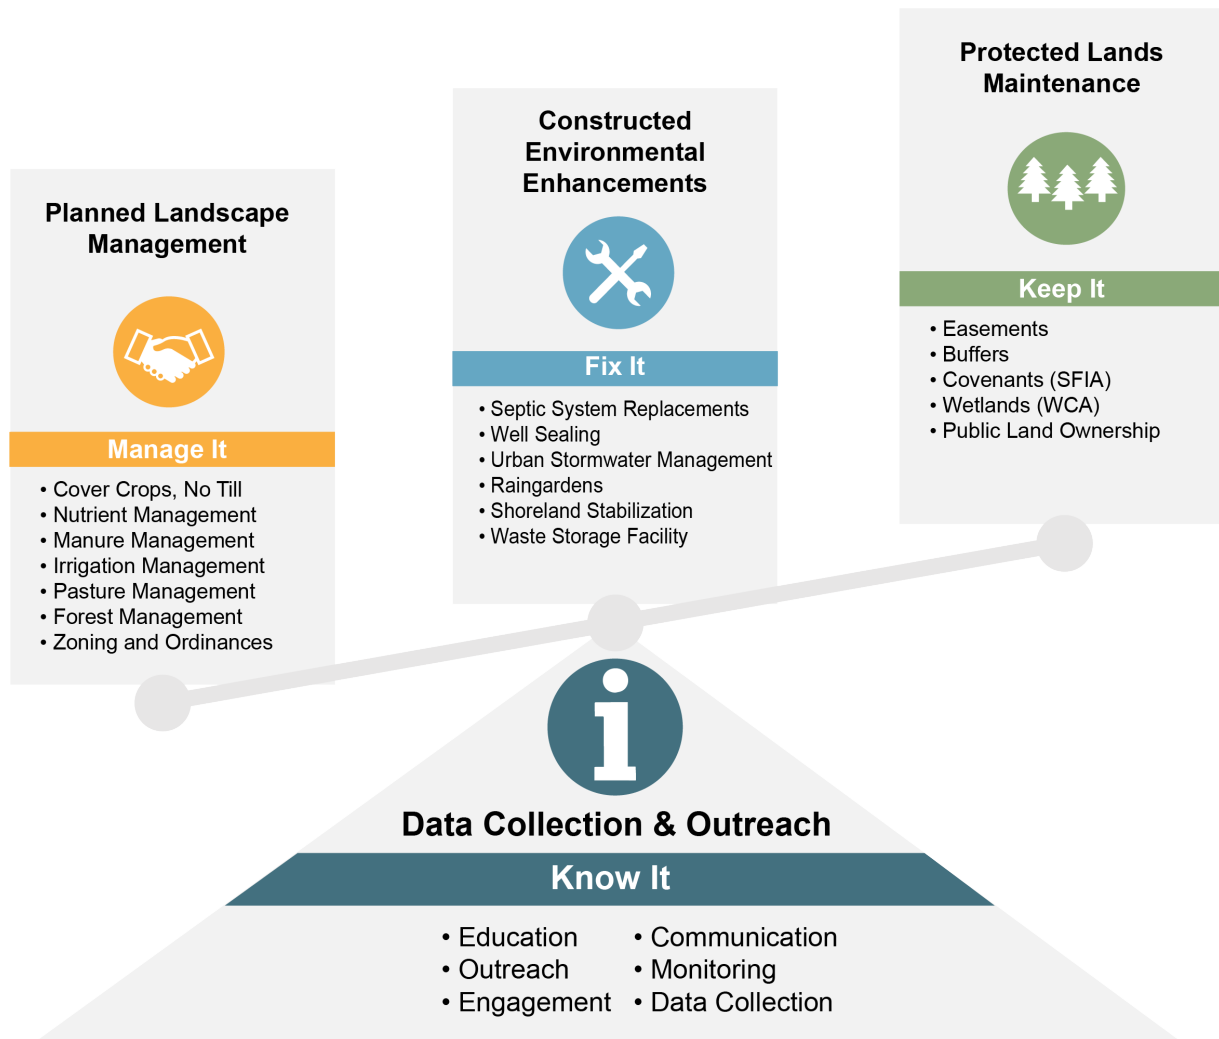

Figure 2 Plan programs for the LFRW.

## Implementation Table Review

The meeting's main activity was to review the drafted implementation tables. Implementation tables include actions that will be taken during the 10-year planning process. These tables include the following information for each action:

- Program Type: Fix it, know it, keep it, or manage it
- 10-year Outcome: Outcome from the action
- Priority Areas: Areas for implementation
- Lead/Supporting Entities: Who is leading (in bold) and who is supporting the action
- Timeline for Implementation: What years will the action be occurring
- Tracking Output: Does the action provide direct or indirect progress towards plan goals (see below)
- Funding Level: Which level of funding will provide resources for this action. Funding levels for the LFRW are summarized in Table 5.1
- Total Costs: 10-year cost for implementing the action

The Advisory Committee members were asked to focus on a few aspects of the implementation tables: the action description, 10-year outcome, priority areas, lead/supporting entities, and timeline for implementation. Committee members were also asked to supply any new actions, as needed.

Attached to this report are the comments from advisory committee members. Since some members were connecting virtually, there are two sets of comments, one in whiteboard form with post it notes (online group) and one with handwritten comments. All tables that had comments are attached.

## Data Gaps Brainstorm

An additional activity was brainstorming data gaps: where additional data collection, monitoring, surveys, or studies may be required to complete plan actions. The following ideas were discussed:

- Unified watershed geologic atlas
- Wider Buffers
- Citizen monitoring program outreach
- Beaver impoundment data
- Sturgeon spawning activity data
- Sediment reduction feasibility study
- EAB management data
- Trout spawning areas
- Updated LiDAR comparisons with older LiDAR data
- Baseline erosion data using LiDAR
- Identifying key areas of landowner engagement

## Meeting Attendees

- Andy Arens – Itasca SWCD
- Austin Steere - Itasca SWCD
- Austin Wallin – Koochiching SWCD
- Ada Tse – St. Louis County
- Chad Severts - BWSR
- James Aasen – Koochiching SWCD
- Jim Hansen - DNR
- Jeff Hrubes- BWSR
- Jólen Simon – Koochiching SWCD
- Mike Kennedy - MPCA
- Matt Picklo– Itasca SWCD
- Matt Gutzmann - Itasca SWCD
- Mitch Brinks, GIS
- Pam Tomevi - Koochiching SWCD
- Phil Norwich – North St. Louis SWCD
- Phil Talmage – DNR

- Skyler Webb – St. Louis County
- Whitney Sims - Koochiching County
- Aaron Frankl - Houston Engineering

# Hydrologic Connectivity & Storage

Little Fork River WATERSHED

## Hydrologic Connectivity & Storage Actions

Action	Program	10-year Outcome	Where	Who	When					Tracking		Total 10-year cost
					2027-2028	2029-2030	2031-2032	2033-2034	2035-2036	Output for goal tracking	Funding	
<i>Just Peatland?</i> <b>Enhance Peatland Connectivity</b> Culvert replacements to restore hydrology through peatlands, forests, and wetlands.		5 culvert replacements	Watershed-wide	Counties, DNR, SWCDs, MNDOT						<input type="checkbox"/>	Base & WBIF	
<b>Enhance Stream Connectivity</b> Enhance connectivity for fish passage.		2 projects	Watershed-wide	DNR, Counties, SWCDs, MNDOT						<input type="checkbox"/>	Other	
<b>Wetland Conservation Act (WCA)</b>		Implement Program	Watershed-wide	BWSR, SWCDs, Counties, Municipalities, DNR						<input checked="" type="checkbox"/>	Base	
<b>Wild Rice Protection</b> Sulfate monitoring, invasive species management.		Increased protection of wild rice	Lakes and streams with wild rice	SWCDs, VNP, Counties, BWSR						<input type="checkbox"/>	Base & Other	
<b>Culvert Inventory for Forest Roads</b> Inventory for areas where hydrology is bisected by forest roads and can be restored.		Complete inventory	Figure 4.5	SWCDs, Counties, DNR						<input type="checkbox"/>	WBIF	
<b>Wetland Banking</b> Encourage and maintain wetland banking.		Maintain access to wetland bank service area	Watershed-wide	Counties, SWCDs, BWSR						<input type="checkbox"/>	Base & WBIF	
<b>Flood Study and Plan</b> Feasibility study and risk assessment for designing flood damage reduction for communities.		1 study	City of Cook	Cook						<input type="checkbox"/>	Base & Other	
<b>Coordinate with Road Authorities</b> On road, ditch, and culvert replacement projects, ATV club; consolidate highway department data.		Biennial trainings	Watershed-wide	DNR, SWCDs, Counties						<input type="checkbox"/>	Base	
<b>Outreach &amp; Education</b> Education on wetlands, wetland banking, peatlands, water storage.		One outreach event(s) per year	Watershed-wide	SWCDs, Counties						<input type="checkbox"/>	Base & WBIF	
										Total BASE and WBIF Funding		
										Total OTHER Funding		

\*Any project that contributes to or otherwise is used to replace wetlands impacted under the WCA per MN Rules 8420 is ineligible for WBIF.

Wetland and gravel, or just wetland?

\*Any project that contributes to or otherwise is used to replace wetlands impacted under the WCA per MN Rules 8420 is ineligible for WBIF.

**culverts and related practices**

Transportation agencies are responsible for road and culvert maintenance. A number of studies have shown that the number of road and culvert projects that are completed each year is significantly lower than the number of projects that are needed. This is due to a variety of factors, including limited funding, competing priorities, and a lack of coordination between agencies.

For enhancing stream connectivity, we should include this to help... Enhance connectivity for fish and sediment passage.

Culvert inventories are one thing, sharing the info with the road authorities to match up with any road plans is crucial.

For the culvert inventory, this is something that DNR fisheries will do on an ongoing basis.

Make a study to identify restored wetlands for the wetland bank program. Restored wetlands are considered eligible to natural undisturbed wetlands for credit generation. To be an undisturbed wetland, entering the program get 75% credits and restored wetlands get 150% credits.

**5 projects?**

DNR Shallow Lakes Program staff also do a lot of work with wetland management and protection, mostly on the water level management side of things, but also involve species management. Not sure if you'd want to include them in this process or not.

# Agricultural Land Management

## Agricultural Land Management Actions

What			Where	Who	When					Tracking	Cost	
Action	Program	10-year Outcome	Priority Areas	Lead(s)	2017-2018	2019-2020	2021-2022	2023-2024	2025-2026	Output for goal tracking	Funding	Total 10-year cost

Maybe add MDA, not bold, regarding the Min Ag cert program they sometimes can provide funding.

Add an r; although cover crops sounds pretty cool!

Streambank is probably under streams and rivers. Here it would be in conjunction with access control

Does smart salting belong here?

Identifying marginal ag lands

Maybe add SWCD and NRCS non-bold

# Stormwater Management

**Little Fork River WATERSHED**

## Stormwater Management Actions

Action	Program	10-year Outcome	Where Priority Areas	Who Lead(s)	When					Tracking		Cost

<b>Total OTHER Funding</b>												

A. Are there 10 stormwater design opportunities to address in the project (see above)?

B. Are there any combinations of stormwater management and best management practices? Should there be?

ST. Louis County Planning & Zoning does not issue stormwater permits. MPCA permit required for land disturbance of 1 acre or more.

We also do not work directly with landowners on stormwater projects.

Building relationships with the small non-M54 communities will be key here. JJ Cook, especially

# Drinking Water Protection

<b>Total OTHER Funding</b>												

Seems to imply that folks are not complying with SSTS ordinance. More effective administration? Are there any technologies or system enhancements that would help with ordinance admin?

# Erosion Management

Frame 3

This might be better phrased as sediment management?

We already have a lot of data here, change language to reflect "feasibility of known sites". Identify ravines that have already been studied

BMPs should be called out

Ordinance updates as needed

Hadn't thought about this before but how does the buffer law and sand blankets/rip rap intersect?

Sturgeon spawning habitat identification/ maps

Shoreline protection programs? Here or forest mgmt?

Baseline erosion data? LIDAR? RRRRL is doing X miles a year to establish shoreline

Comparison of new vs old LIDAR?

## Erosion Management Actions

Action	Program	10-year Outcome	Where	Who	When				Tracking		Cost

<b>Outreach &amp; Education</b> <i>Local foresters, workshops, tourism, stewardship programs, invasive species identification</i>		One outreach event per year	Watershed-wide	SWCDs, DNR, NRCS, BWSR, Counties, Cities	•	•	•	•	•	<input type="checkbox"/>	Base	
Total BASE and WBIF Funding												
Total OTHER Funding												

Does this mean Coordination of Forest Management is not a goal? It's implied and obvious to most here but for WBIF, the forest management has to be for water quality. Might not hurt to lead with that.

Maybe explain if how this is different than the small parcel mgmt in the first action item

why not track goals for small parcels?
